WHAT IS VIRTUAL PICTURE ATLAS?

Hi, welcome to Virtual Picture Atlas!

I'm so glad that you see the value in having a tool that will dramatically increase your efficiency as you review high-yield board-related images.

The current system forces you to spend several minutes only to review a single image for a single disease. This new system that I have created for the PBR allows you to view images in a manner of seconds, do your learning, and move on to the next topic very quickly. The beauty of the system is that it collects images from all throughout the web. So, if I found an amazing image on a random website somewhere that I would like to share with you, this system allows me to do that.

There is one downside to this system that you must be aware of. These images are not owned by PBR. These websites are not owned by PBR. That means that at any given point in time, the entire website or image could stop working. In my experience, over the course of 10+ years from the date of creation of this product, there should only be approximately 5% of the links that do not work. It can be more, but I really doubt it. That means that on the 400 images that are made available to you through this amazing resource, approximately 20 of them would potentially not be available to you.

I would absolutely love it if you could help PBR by notifying us immediately of any images or links that do not work. You could actually go to the following link and participate in fixing these problems in a way that would not only help you, but it will also help the entire PBR community.

www.pediatricsboardreview.com/error

All you have to do is right click on the link, copy it, and paste it in the second column on this page. I made it a public page, which means that anyone who is a PBR member has access to it.

Also, if you have an interest in viewing how I would use this resource as a PBR member please watch the video below.

A Few [CRITICAL] Reminders

ARE YOU TAKING THE INITIAL CERTIFICATION EXAM? TAKE THE RISK CALCULATOR!

This exam is MUCH HARDER than the USMLE exam. In order to understand how many times you should go through the material, and in order to understand HOW to go through the material, you go through the [PBR RISK CALCULATOR](#) now and find out if you are at low, moderate or high risk of failing the exam. Then you'll know if you should go through the PBR Core Study Guide and the Q&A Book a minimum of 3 times or 5 times. **For low-risk test-takers**, AT LEAST 3 rounds of the material is recommended. **For high-risk test-takers**, AT LEAST 5 rounds of the material is recommended AND a strong focus on test-taking strategy. Your risk profile depends on many factors (exam history, scores on in-training exams, your residency program, and more). Visit www.pbrlinks.com/RISK-CALCULATOR and go through the [PBR RISK CALCULATOR](#) now.

ARE YOU GOING THROUGH MOCA-PEDS?

MOCA-Peds participants do NOT need the PBR Core Study Guide or the PBR Q&A Book. Instead, you need the (super cheap) [MOCA-PBR Study Guide & Test Companion](#) to help you quickly and EFFICIENTLY run through this year's 45 Learning Objectives and 2 Featured Readings. Then you can also use the MOCA-PBR as a "test-companion" on your "open book" and "open computer" MOCA-Peds questions. It's kind of amazing.

Visit www.pediatricsboardreview.com/MOCA-PBR and Learn More Now

ARE YOU TAKING THE TRADITIONAL, 4-HOUR MOC EXAM?

Going through the PBR Core Study Guide and Q&A Book 2 times should be PLENTY. The pass rate for the PBR has historically 100% for multiple years in a row for practicing general pediatricians. The most common feedback is along the lines of, "Ashish! I only read it once... and I passed!"

"LOW-ISH" USMLE SCORES? FAILED A BOARD EXAM? WORK ON TECHNIQUE!

Seriously, seriously, SERIOUSLY! This exam can wreak havoc and chaos in your life. The techniques that are taught in PBR'S Test-Taking Strategies & Coaching courses have helped pediatricians finally pass the boards after they had failed MULTIPLE times. Learn the "board game" by understanding question-answering STRATEGIES. Start seeing an increase in your practice exam scores IMMEDIATELY. **PBR has helped a pediatrician pass on her 11th attempt!** So helping YOU should be easy. Don't have regrets. Visit the link below now and learn more about our self-paced and LIVE Test-Taking Strategies Courses. And if you're a high-risk test-taker, PLEASE consider signing up for the [VIP BUNDLE](#).

www.pediatricsboardreview.com/technique

DON'T FORGET TO DO TONS OF BOARD REVIEW QUESTIONS... FOR PRACTICE!

Do at least 1000 practice questions if you're studying for the ABP initial certification boards, and at least 300 if you're taking the ABP MOC recertification exam. The first choice is the AAP PREP® series of questions, but PBR also has trusted affiliate relationships with other great companies that give you MASSIVE discounts on questions to use for PRACTICE! Just visit www.pediatricsboardreview.com/tools for member discounts.

MAXIMIZE YOUR LEARNING OPPORTUNITIES & MODALITIES!

PBR helps you **study EFFICIENTLY**. It's an entire SYSTEM that BUILDS on itself to give you the highest chance of passing your board exam. **REPETITION and MULTIMODAL** studying have both been **proven to increase learning**. The videos, the MP3s, and the summertime live webinars will help you **maximize your time and learning!** Visit www.pediatricsboardreview.com now and find the right PBR resource to help you maximize your learning efficiently (MP3s, Video Course, Webinars, Pediatric Atlas...).

Can't Decide What To Use Next? You Don't Have To!

PBR is now offering a discounted bundle that includes **ALL OF OUR BOARD REVIEW products for over 50% off**. This should **remove the mental obstacles of money and finances** that sometimes causes pediatricians to fail. The package is called the **PBR No Brainer**, and it includes a video course, an audio course, live (and recorded) webinars, an online digital picture atlas, our hardcopy Core Study Guide, our hardcopy Q&A Book, our Full Online Test-Taking Strategies Course and even a Personalized Study Schedule created just for you!

Visit the Link Below and Learn More About the **No Brainer** Enrollment & Upgrade Opportunities
